01 PROFILE

Founder & Director of **Nexo Bajío** and Head of Software Development at **Envasadora Aguida**. 3 yrs 5 mos of continuous professional experience designing, building and operating the systems that keep industrial and service companies running: software architecture, ERP systems, Linux infrastructure and custom development. At Envasadora Aguida I went from systems intern to head of the development area in ten months. I am accountable for the systems I lead, from the architecture down to the server they run on. Currently pursuing a Master's degree in Artificial Intelligence.

02 PROFESSIONAL EXPERIENCE

Founder & Director

Nexo Bajío | Own firm · Self-employed

FEB 2026 — PRESENT · 7 MOS · DOLORES HIDALGO, MEXICO

- Founded and lead a technology firm that turns operational problems into working solutions: support, consulting and software development.
- Business development and direct client relationships; operational assessment and definition of the technology roadmap.
- Custom software development, systems integration and management of client digital presence.

Head of Software Development

Envasadora Aguida | Full-time · Tetra Pak aseptic packaging

NOV 2025 — PRESENT · 10 MOS · SAN LUIS DE LA PAZ, MEXICO [TOTAL TENURE: 1 YR 8 MOS]

- Architecture, development and continuous refactoring of the **corporate ERP** that supports the plant's logistics and production.
- Designed the system from scratch: 12+ integrated modules with distinct profiles for management, administration and operations.
- Administration of the production Linux + Apache server; development standards, version control and documentation.

Previous roles at the same company

- **Assistant Systems Engineer** AUG 2025 — NOV 2025 · 4 MOS
- **Systems Assistant** APR 2025 — AUG 2025 · 5 MOS
- **Information Systems Intern** JAN 2025 — APR 2025 · 4 MOS

Technical Consultant

Luis Guerrero González y Asociados | Law firm · Fixed-term contract

JAN 2024 — PRESENT · 2 YRS 8 MOS · DOLORES HIDALGO, MEXICO

- Ongoing advisory on technology, cybersecurity, infrastructure and software, acting as the bridge between technical rigour and the legal framework.
- Analysis and review of digital information from mobile devices; technical assessment of geolocation data and metadata.
- Preparation of technical reports for the legal team. Work subject to confidentiality.

Software Developer Trainee

Optimen | Full-time

APR 2023 — OCT 2023 · 7 MOS · LEÓN, MEXICO

- Development, testing and maintenance of corporate web modules using React.js and AWS cloud services.
- Processing and analysis of geospatial and vector data with Python for the water and aerospace sectors.
- Support in prototyping and system improvement for industrial clients.

03 SELECTED WORK

Corporate ERP for logistics and production

Envasadora Aguida 2025 — PRESENT · IN PRODUCTION

System designed and built from scratch to unify logistics, production and internal process control at an aseptic packaging plant, with traceability by area and reporting for management. **Outcome:** live in production and under continuous refactoring; I have led its architecture since November 2025.

PHP · REACT · MYSQL · APACHE · LINUX · TCPDF / MPDF

Digital presence and client acquisition

SaniPlagas — via Nexo Bajío 2026 — PRESENT · LIVE

Website and Google Ads campaigns with conversion tracking for a pest control company operating across four cities in the Bajío region, built around a single action: booking an inspection. **Outcome:** active acquisition through the form and WhatsApp, with campaigns under ongoing management.

REACT · GOOGLE ADS · ANALYTICS & CONVERSIONS · ONGOING SUPPORT

Technical consulting in a legal context

Luis Guerrero González y Asociados 2024 — PRESENT · ONGOING

Translating technical material —metadata, geolocation, device information— into language that lawyers and expert witnesses can defend within the legal framework, without losing rigour. **Outcome:** ongoing collaboration since 2024. Work subject to confidentiality.

DIGITAL INFORMATION ANALYSIS · METADATA · CYBERSECURITY · TECHNICAL REPORTING

04 TECHNICAL CAPABILITIES

Technical leadership — Software architecture · Scope and priority definition · Refactoring live systems · Standards and documentation · Communication with management and operations

Backend & data — PHP · MySQL / MariaDB · Node.js · Express · Composer · REST APIs · TCPDF / mPDF / PHPOffice

Frontend — React · Next.js · JavaScript · HTML5 / CSS3 · Tailwind CSS · Bootstrap · Responsive design · PWA

Infrastructure — Linux · Apache · Server administration · Git / GitHub · Vercel · AWS · Backups and continuity

Currently learning — Applied artificial intelligence · Python · Cybersecurity · Process automation
